scikit-learn

- scikit-learn is the leading machine learning software in Python
- scikit-learn is a project started in Paris, Telecom ParisTech and Inria
- scikit-learn is easy to use and extend

scikit-learn Session Lab Assignment

Write a jupyter notebook with the following tasks:

With the iris dataset:

- 1 Use two other classifiers
- 2 Use cross-validation to evaluate the classifiers
- 3 Compare evaluation results of the three classifiers
